Abstract [font: 11 pt, bold]: Twenty years ago, IOBC published a document that can be considered as one of the cornerstones of Integrated Production in Europe. Key element in this collection of documents is the Declaration of Ovrannaz. It was established by a group of entomologists that met in the Switzerland to discuss basic aspects and principles of Integrated Plant protection and production. It is gratifying to observe that the work of the IOBC carried out during the last 20 years has not only found its precipitation in European agriculture but has also generated interest outside the WPRS-region.
